

Laser Energetics Demonstrates Dazer Laser™ at the Emmy Awards

Company Establishes the Have a Heart – Save a Life™ Fund

Mercerville, NJ – September 24, 2009 – Laser Energetics, Inc. (Pink Sheets: [LNGT](#) - [News](#)) announced today that the Company has successfully completed and demonstrated the first prototypes of the Dazer Laser™ – DEFENDER and Dazer Laser™ – GUARDIAN at the Emmy Award Gift Suites, visited by actors, actresses, sports celebrities and the media.

In addition the “**Have a Heart - Save a Life™ Fund**” was also rolled out to a very welcoming and excited crowd of celebrities. “The fund will provide monies to the families of law enforcement and US military personnel that bravely lost their lives in the line of duty serving their country,” states Robert Battis, Founder, President & CEO of Laser Energetics. “The Fund was created by Laser Energetics in conjunction with the Star Spangled Americans Society.”

Photographs of the new Dazer Laser™ – DEFENDER and GUARDIAN – Light Fighting Technologies, along with pictures of the celebrities holding both of them, may be found on the Company’s website at www.laserenergetics.com. We expect to be in a position to make some exciting new announcements regarding sales activities in the very near future.”

About Laser Energetics, Inc.:

Laser Energetics has and continues to develop a comprehensive and strategic laser product line that addresses applications in Industry, Science, Medicine and the Military. The Company has had a primary focus on its Alexandrite laser technology. These tunable solid state lasers are unique in that they can be conductively air cooled to compete favorably against water cooled lasers in many applications. In addition, these lasers have one of the greatest wavelength tuning ranges with a bandwidth of over 250nm. The company is pursuing markets that are diverse yet can use the same laser with their compact user friendly design. This laser technology provides a sustainable advantage over many other lasers because of their tune-ability, conductively air cooled operation, and their efficiency.

Laser Energetics believes its BrightStar™ Alexandrite laser technology, in its various forms, has many applications on the battlefield as well as for homeland security, including detection of chemical and biological warfare agents and detection of high explosives. As stated by Robert Battis, CEO of Laser Energetics, Inc.: “We believe that Laser Energetics is on the fast track with the development of the BrightStar™ Alexandrite laser”. “We will continue to develop and test this product within multiple market sectors outside of the military to further the Company’s near term growth.” The potential for future sales, given the size of the total market, may well be in the hundreds of millions of dollars.

Safe Harbor: Statements regarding financial matters in this press release other than historical facts are “forward-looking statements” within the meaning of section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934, and as that term is defined in the Private Securities Litigation Reform Act of 1995. The company intends that such statements about the Company’s future expectations, including future revenues and earnings, technology efficacy and all other forward-looking statements be subject to the safe harbors created thereby. The Company is a development stage company who continues to be dependent upon outside capital to sustain its existence. Since these statements (future operational results and sales) involve risks and uncertainties and are subject to change at any time, the Company’s actual results may differ materially from expected results.
