

Laser Energetics Attends Counter Terror Expo and the SpecOps Warfighter Expo East

Dazer Laser™- Light Fighting Technologies Met With Excitement From Military and Law Enforcement Officials

Mercerville, NJ – April 15, 2010 – Laser Energetics, Inc. (Pink Sheets: [LNGT - News](#)) is proud to announce that it is currently in attendance at two prominent tradeshows designed for companies whose products are utilized by Military Special Ops Forces, Security, Law Enforcement and Corrections officials engaged in the war against terrorism.

The Counter Terror Expo, currently going on in London, is a secure exhibition showcasing the latest in specialist security technologies and products as well as solutions which form a crucial part of counter terrorism capabilities internationally. The Counter Terror Expo offers a forum for senior buyers and specifiers to see the latest solutions which assist in the prevention and protection from terrorists globally. Last years 2009 event broke expected attendance figures by a factor of 50 percent, where more than 4,000 qualified personnel from government, military, law enforcement, intelligence and private sector organizations from the UK, US and other nations, attended the event. This years event looks even better.

The SpecOps Warfighter Expo, currently going on in Fayetteville, North Carolina, is designed for military personnel who require and demand the best tools of the trade as they serve as fighters of terrorism. The Special Operations Group, as well as the entire force, is facing an unprecedented operational tempo with tireless determination and self-sacrifice. The right equipment and training is imperative as a credible force multiplier. The Expo enhances opportunities for military personnel to view first hand the latest products, innovations and technology available to protect and enhance their capabilities. The event is an excellent opportunity for the introduction and promotion of new technologies and solutions to the elite forces. In addition, it is a venue for interaction between users of the technologies and the manufacturers with the goal of increasing the mission effectiveness of our nation's forces.

"We are very excited to be attending these prestigious shows." said Robert D. Battis, CEO and Founder of Laser Energetics, Inc. "Our team has been presenting and demonstrating our 'Non-Lethal - Less Violent' technology to all branches of military and law enforcement, and the reception has been spectacular at both shows. Our Dazer Laser – Light Fighting Technologies "optical distracters" which are designed to operate "eye-safe" at all ranges, has been a real hit at the shows. The marketplace is recognizing the need for this tactic changing technology. Pictures of our booths at the shows are now posted on our website at www.laserenergetics.com. More pictures will follow over the next few days. We expect to make several important announcements as a result of activity taking place at these shows.
