

Laser Energetics, Inc. Dazer Laser Eye Safety Study Proves the Dazer Laser Can Be Operated Safely at All Ranges

Nevyas Eye Associates/Delaware Valley Laser Surgery Institute Conducts Eye Safety Study

PRINCETON, NJ -- (Issuer Direct) - July 16, 2010 – Laser Energetics, Inc. (Pink Sheets: [LNGT](#) - [News](#)) is pleased to announce the Company has had an independent organization, Nevyas Eye Associates/Delaware Valley Laser Surgery Institute, conduct an Eye Safety Study on ten (10) human test subjects at ranges as close as six feet (2 meters) away who were Dazed with a Dazer Laser[®] – Light Fighting Technologies – Optical Distractor. The study conclusively proved that the test subjects eyes remained unchanged after three 10 second Dazings at power levels above those sold in the market place.

“LEI has achieved a very important objective, and that is for our Dazer Lasers[®] to be capable of operating safely at ALL ranges from 1 to 2400 meters. We now have independent and conclusive test results that confirm our Optical Distractors do what no others in the world can do, and this will have a direct result in securing orders from the US Government, Friendly Countries & Governments, Institutions and Companies,” says Robert Battis, Founder and CEO of Laser Energetics, Inc. “This is a clear indication of the technical superiority of the Dazer Laser[®]. Others ignore safe operation or deploy interlocks that do not allow their devices to operate at close ranges. Imagine trying to use a device that doesn’t work at close ranges because it was not engineered to operate safely up-close. This could cause a soldier or law enforcement official to be killed. It’s analogous to firing a blank instead of a bullet. The Dazer Laser[®] can operate close-up and personal, which is the way real tactical engagements occur”, states Battis. This is a result of superior engineering with our Variable Range and Focus Optics found in our Dazer Laser[®] GUARDIAN and DEFENDER models. Adding our M.E.A.N Beam technology and our GreenStar[™] DPSS Green Laser technology that operates more efficiently and cooler, we have the Best and Safest Night and Day time Optical Distractors in the World. With General Dynamics - ATP manufacturing the Dazer Lasers for Laser Energetics, we will make the world a safer place by

“Saving Lives – One DAZE at a Time[™]”!
